

Network Video Recorder

Quick Start Guide

1. Notes

- Please read this instruction carefully before using the product and keep it for further reference.
- All the examples and pictures used here are for reference only.
- The contents of this manual are subject to change without notice.
- This device should be operated only from the type of power source indicated on the marking label. The voltage of the power must be verified before using the same.

2. Packing Check

Please check the device and the accessories after getting the device. If there are any damages, shortages or defects, please contact your dealer immediately.

3. HDD Installation

This series of the product supports 1 SATA hard drive. Please make sure that the device is powered off before the installation. The pictures of the installation are only for reference, please take the real object as the standard.

- ① Loosen the screws to open the cover.
- ② Screw the screws into the HDD but not tighten them.
- ③ Place the HDD onto the bottom of the machine.
- ④ Turn over the machine and secure the HDD with the screws.
- ⑤ Connect the power and data cables.

- ⑥ Install back the cover and secure it with the screws.

Tips: Please check the inside structure of the device and make sure the cables connected well before installing the cover back. Please format the HDD before using.

4. Rear Panel Instruction

The interfaces of the rear panel are for reference only.

Name	Description
P/Z	Connector for a PTZ device. Y is TX+, Z is TX-
K/B	Connector for a keyboard. A is TX+, B is TX-
ALARM OUT	Relay output; connectors for external alarm output devices
GND & ALARM IN	Connectors for alarm input devices, like sensors
AUDIO OUT	Audio output
AUDIO IN	Audio input
LAN1/2	2 Ethernet ports
VGA	Connect to monitor
HDMI1/2	Connect to high definition display device
USB	Connectors for USB devices (like USB mouse, USB storage device for backup or upgrade, etc.)
DC12V	Connector for power input

5 Startup & Shutdown

► Startup

- ① Connect the monitor and the power.
- ② The device will boot and the power indicator will display blue.
- ③ A wizard window will pop up.

► Shutdown

Click “Start” and select “Shutdown” icon. This will bring a shutdown window. The device will shut down by clicking “OK” button. Then disconnect the power.

6. Login

You must configure the wizard if you start the NVR for the first time. Choose the language and read the privacy statement. Then set the data, time and zone as needed. After that, set the login password.

The default username is **admin**. Set your own password when you use the wizard for the first time. Enable pattern lock and click “Edit” to set the pattern

lock. Then set security questions and answers. It is important for you to remember these answers, or you will not be able to reset your password. Click “Next” to continue.

7. Disk Settings

You can view the disk number, disk capacity of the NVR and serial number, Read/Write status of the disk. Click “Format” to format the disk. Click “Next” to continue.

8. Network Configuration & Add IP Camera

- ① Select the work pattern and then enter IP address, subnet mask, gateway, etc. If using DHCP, please enable DHCP in both the NVR and the router. Network Fault Tolerance: Bind two network ports to one IP address. This pattern can increase the network bandwidth and form a network redundant array to share the load. When one port goes wrong, the other port will take over the entire load immediately and seamlessly. Multiple Address Setting: You shall set the IP address, subnet mask, gateway and DNS of each Ethernet port separately and select one NIC card connected to the Internet as the default route.
- ② Enter HTTP port (the default value is 80) and server port (the default port is 6036).

- ③ Add Camera. Click “Next” to go to the following interface.

Click “Refresh” to refresh the list of online IP cameras which are in the same local network with the NVR. Click + to add the searched camera. Click “Add All” to add all the cameras in the list. Click  to delete the added camera. Click “Delete All” to delete all the added cameras.

Visit Address

www.autonat.com

NAT Status

Success

Apply

Enter the visit address in the address bar of your browser and then press enter to go to the following interface. If you are the first time to access the NAT, you shall download and install the plug-in according to the popup tips. After installing the plug-in successfully, it will appear the login box.

Enter device serial number

Enter Username

Enter Password

Login

Device Serial Number: Click  on the menu bar at the bottom of the live interface to check the serial number or go to Start → Settings → System → Basic to check the serial number of the NVR).

Username: The username of the NVR. The default username is admin.

Password: The password of the NVR. The password is set by yourself when you configure the wizard for the first time.

11. Cloud Upgrade

Before using this function, please enable NAT2.0. Then click “Cloud Upgrade” in the wizard interface. Go to Start →Settings →Network → Cloud Upgrade interface and click “Upgrade” to upgrade your device if it is not the latest version.

12. Manual Recording

Before recording, please install a HDD. In the live interface you can see the menu toolbar. Click  button to start recording. Click it again to stop recording. You can also click  to check the status of the recording.

13. Playback

► **Instant playback**

Click “Instant Playback” in the right-click menu of the camera’s preview window to select or drag the playback progress bar to change the playback time to play back the record.

► **General playback**

Click  on the tool bar at the bottom of the live view interface or click Start → Playback to go to the playback interface as shown below. You can also add the playback cameras manually. Click  in the playback window to pop up the “Add Camera” window. Check the cameras in the window and then click “Add” to add playback camera. The record files of the added playback camera will be played in the playback interface.
